CATALYST V2

The Catalyst V2 is based upon the well-proven hull shape originally designed by Morrelli & Melvin for use as an America's Cup chase boat, an exceptional design renowned for its outstanding blend of performance, ride quality, and manoeuvrability, even in a challenging seaway. Its performance is further enhanced by its strong and lightweight carbon reinforced composite construction.

While already a standout in the marine world, our extensive testing identified a few subtle refinements that could further enhance its performance under specific conditions.

Our latest evolution, the Catalyst V2, features a vertical stem that enables deeper V-shaped bow sections. This design improvement enhances ride comfort when heading into waves and allows the hull to span longer wave periods due to the extended waterline length.

We've also redesigned the topsides and cabin layout, which now offers full headroom throughout the bow accommodation area. This has enabled us to create a more refined and stylised vessel.

Staying true to Catalyst's core philosophy of design flexibility and customisation every vessel is built to reflect the owner's vision. Options include multiple cabin configurations and interior layouts, fold-down hull sides, flybridges, tuna towers, dive platforms plus a wide range of power and drive systems, and more.

If you can dream it, we can design and build it.

CATALYST V2

Configuration D:

- Classic cabin top
- Cabin with dinette
- Bow accommodation spaces

CATALYST V2

Configuration A:

- Full side deck
- Fold down hull sides
- Cabin with dinette
- Mid bow seating with cover panel
- 4 shock absorbing seats

LOA	11.5m to 17m (38' to 56')
Beam	4.15 m hard sides, 4.3m foam fender, 4.7m pneumatic tubes
Draft	0.5 m (1'8")
Weight	6,000kg to 10,000 kg (dependent on configuration chosen)
Engines	Typically 2 x 600 hp to 4 x 500 hp outboard or multiple inboard options available
Max speed	45 to 60 knots with most outboard options, 40 knots with jet drive, 55+ knots with surface drive, 47 knots with IPS. Stern leg and direct drive options are also possible. <i>Speeds are an estimation based off data from Catalysts currently in service and are highly dependent on the vessel's final configuration.</i>

CATALYST V2

Configuration B:

- Walk around cabin
- Cockpit kitchenette
- Cabin side panels removable
- Fold down hull sides
- Bow walk through
- Bow stairs
- Bow seating
- 8 shock absorbing seats

CATALYST V2

Configuration C:

- Open cockpit with options to add a fold down cabin top
- Fold down hull sides
- Cabin with dinette
- Mid bow seating with cover panel
- 4 shock absorbing seats

CATALYST V2

CATALYST V2

Grid socket system in deck to allow multiple deck configurations with seating, tables, BBQ console etc & attachment point for securing dirt bikes, mountain bikes, supplies etc.

CATALYST V2

LWL	13.7m (50 ft)
Beam	4.3 m
Draft	0.5 m
Weight	8,900 kg
Engines	2 x 600 550 hp Diesels, 2 x Konrad Stern Drives
Max speed	45+ knots

CATALYST V2

Catalyst Flybridge, Tuna Tower & Amphibious

CATALYST GT

Water sports & guest transfer tender commissioned
by a private resort in the Caribbean

LOA	13.7m (45ft)
Beam	4.2 m
Draft	0.5 m
Weight	6,800 kg
Engines	4 x 300 Yamaha
Max speed	53 knots
Passenger's	32

CATALYST GT

Custom superstructure and bow beach landing stairs option

CATALYST GT

Swim ladder by: **C-DUIP**

Catalyst Adventurer

LOA 13.7 m (45ft) foil assisted
Beam 4.7 m (tubes deflated 4.1m)
Draft 0.5 m
Weight 7,600 kg
Engines 2 x 600 Mercury V12
Max speed 54 knots

Fuel capacity: 3,200 L
Range at 40 knots: 650 Nm, 16.3 hours (internal tanks only)
Range at 20 knots: 800 Nm, 40 hours (internal tanks only)
Range at 37.3 knots: 1,044 Nm, 28 hours (delivery tanks at 2,550 L)
Range at 43.5 knots: 1,044 Nm, 24 hours (delivery tanks at 2,900 L)

OPTION:

A towed inflatable 5.2m long sled attached to an automated pivoting stern platform.
Sled can be configured as a jet ski transporter

Available for Charter at: www.renderfiji.com
